

Dear Authors,

Felipe Pinto da Motta Quevedo, Carlos Alberto Magnus Maciel Colombo, Bianca Milena Girardi, Denise Bernaud, Samir Maghous

We are pleased to inform you that your full-length paper entitled "**Finite element analysis of rock deformation in deep twin tunnels**" has been **ACCEPTED** for publication and presentation in the *XLV Ibero-Latin American Congress on Computational Methods in Engineering (CILAMCE-2024)* to be held in 11-14 November 2024.

Revisions have been suggested, please check your restricted area at the congress system, access <https://cilamce.com.br/>

The revised version of your paper is due on **September 16**, 2024. Please follow this deadline strictly as no extensions are being considered. Inclusion of your paper in the proceedings depends on submitting this revised version by the deadline.

In order to guarantee that your paper is scheduled for presentation and included in the congress proceedings, please pay attention to the deadlines for **payment of your registration fee**. You do not need to wait for your revised version to be ready to pay your registration fee: you may already proceed to payment. This is because the status of your paper ("Accepted for publication") will no longer change from now on.

Notice that CILAMCE-2024 adopts a one-paper, one-registration policy. This means that the presenting author of a paper must necessarily pay his registration fee. Also, if a participant is the presenting author of more than one paper, it must be paid the additional paper fee. Each participant of CILAMCE-2024 can submit up to one additional paper.

If you have any questions, please contact the Congress Secretariat at secretaria@cilamce.com.br.

We are looking forward to meeting you next November for the CILAMCE-2024!

Warmest regards,
CILAMCE-2024 Organizing Committee
